### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3662

1. Claims 1, 2, 4, 6, 9-39, and 42-48 are allowable over the prior art of record.
2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 40 is rejected under 35 U.S.C. 102(b) as being anticipated by Huntington ('257) or Wilson et al ('787).

In independent claim 40, the statement “the signal used to align a transmit/receive direction of a radar device” is a statement of intended use that has no structural significance for the claim since a means or structure is not claimed to perform the alignment mentioned in the phrase.

Huntington ('257) plainly shows a device to test radars (Figure 1). Figure 2 of Huntington ('257) plainly shows a “receiving section ...” as at least item 22 of Figure 2 of Huntington ('257) and a “converter ...” as at least item 26 of Figure 2 of Huntington ('257). Please note at column 2, lines 37-52 of Huntington ('257) that item 26 of Figure 2 of Huntington ('257) does convert the frequency to a lower signal (i.e., IF). Similarly, Wilson et al. ('787) plainly shows a “receiving section ...” as at least item 21 of Figure 2 of Wilson et al. ('787) and a “converter ...” as at least item 22 of Figure 2 of Wilson et al. ('787). Please note column 4, lines 39-65 of Wilson et al. ('787) with respect to the frequency conversion aspect of item 22 of Figure 2 of Wilson et al. ('787). Item 22 converts the received frequency to IF.
